

Baltic Wood

Baltic Wood is one of the most dynamically developing manufacturers of three-layer engineered hardwood flooring in the world. The company belongs to the Nowy Styl Capital Group – the manufacturer of a wide range of furniture, chairs, sofas, office solutions, stadium and auditorium seating systems – which has 3500 distributors in over 60 countries.

Baltic Wood was established in 1999. The production plant and main registered office of the company are located in Jasło, the trade offices are located in Cracow, Jasło and New York (USA).

We put our stakes in modernity, which concerns both the technology we use, and our care for an ecological, environmentally friendly production process. Having at our disposal a technologically advanced factory with a production output of 2.5 million square meters of hardwood flooring a year, we process the raw material on a new generation of computerized production lines. Careful selection of wood, laser measurements and in-depth quality control at every stage of the production process allows us to achieve the highest world standards.
