Jeans®
Collection

DEMOCRATIC FLOORS FOR HER AND FOR HIM

A collection of 7 fashionable and blockbusting floors with identical finish, in the 1-row board pattern – for HIM, and in the 3-row slat pattern – for HER. Owing to this it is possible to combine both the designs in various rooms, preserving the colour scheme effect.

The adhesive-free 2G joint makes for quick and clean assembly. They are well suited for installation over underfloor heating systems.

Main features of the collection

100% NATURAL WOOD

Three-layered structure of 2.7 mm thick top layer made of oak, and the middle and bottom layers made of spruce.

SQUARE EDGE OR MICROBEVEL

System of perfect floor element matching with guarantee of the effect of perfectly uniform surfaces, with almost imperceptible joints between individual boards.

Delicately crafted 2mV microbevel on the short and long sides of the board which enhances the shape of individual boards.

2G ADHESIVE-FREE ASSEMBLY SYSTEM

Adhesive-free joint, which enables a quick and clean installation. The floor is ready to be used right on installation.

INSTALLATION OVER UNDERFLOOR HEATING

Every floor in the collection can be installed over underfloor heating, thanks to which you will achieve the effect of a floor which is always warm to the touch.

Grade of oak wood

OAK CLASSIC

Contrasts of wood colour and pattern, medium-sized knots, and no external sapwood.

OAK VILLA

Colour variation, medium-sized knots, occasional, up to 20% of the elements, sapwood in up to 8% of the board width.

OAK COTTAGE

Distinctly rustic character, sharp wood colour and pattern contrasts, large knots, up to 15% of the batch elements may contain sapwood with surface limitation, and about 40% of the batch elements may contain sapwood in 20% of the surface.

Stylish look

7 pairs of fashionable and hit floors of colours and characters redolent of the climate and style of European metropolises.

PERFECT MATCH

Thanks to identical finish it is possible to combine both designs in various rooms in an apartment or a house, without the need to give up on the visual effect, and the costs of the floor going down.

DIFFERENT PATTERNS

You can choose your ideal floor in the the design of the one-row board – wide or slim (for HIM), and the three-row slat (for HER).

WELL PROTECTED

Jeans floors are covered with 7 layers of varnish, thanks to which they become sturdy, durable, and take on a beautiful, uniform shine.

Fashionable universal floor

For many years now denim has been used to adorn both women and men. It is a democratic offering par excellence – for both sexes and for every budget.

Baltic Wood

Baltic Wood combines fascination for the beauty of wood and knowledge about its specialist treatment. Thanks to this, Baltic Wood floors are not only beautiful, but also perfect in terms of quality – durable, functional and easy to maintain on a regular basis.

OUR MISSION

We believe that the floor made of the highest quality wood is that which lends a unique character to every interior – both the classical and the modern one. That is why we continually follow the latest trends in design so as to cater to the tastes of both traditionalists and those who value more avant-garde design.

SUPREME QUALITY

Creating floors of the highest quality is our main goal and priority in the strategy of the company development. All the processes – designing, planning, manufacturing and delivering the goods – are based on a single, coherent Integrated Quality and Environmental Management System.

KNOWLEDGE AND EXPERIENCE

The company was founded 20 years ago in Poland and quickly expanded its brand into the international marketplace. Today, thanks to an extensive partner network, Baltic Wood floors reach clients in 62 countries all over the world. The modern production plant, the company head office and the sales offices are located in the town of Jasło, the Subcarpathian Province.

WE CARE FOR THE NATURAL ENVIRONMENT

We love nature and therefore we take so much care to make the manufacturing of Baltic Wood floors meet the most rigorous conservation standards. The supreme quality and care for the environment certified by: FSC, M1, TÜV.

Wooden floors

Nature offers beauty, harmony, elegance and style which cannot be replaced with any substitute.

Three-layered floors

precision of workmanship +
reliable use

WOODEN FLOOR

Thanks to the natural properties of the material and its characteristic and original look, wooden flooring makes it possible to create a cosy, distinguished interior with a touch of comfort and safety. Wood is warm and pleasant to the touch, and so it makes you want to walk barefoot around every nook and cranny of the house. Besides, it has very practical qualities – it muffles noises and sounds of footsteps. The natural material also ensures a long lifetime – time is on its side, making it look more and more noble, and thanks to its (multiple) renovatability, we can enjoy its unchanging beauty for many years.

Baltic Wood wooden floors owe their uniqueness primarily to nature inspiringly displayed in flooring compositions that lend interiors a fascinating character.

CARE FOR NATURE

With the support of innovative technology compliant with the highest quality standards, Baltic Wood wooden floors are sustainable and eco-friendly.

THE STRUCTURE OF THREE-LAYERED FLOOR

Baltic Wood floor comprises three layers. The top layer made of noble wood (2.7-6.6 mm thick) is covered with seven coats of lacquer or two coats of oil. Both the finishes make up, on the floor surface, a thin, flexible and durable protective coating. The middle layer (approx. 8.9 mm thick) includes transverse spruce slats that reinforce the floor flexibility. The bottom layer (approx. 1.6 mm thick) is made of uniform spruce veneer, which stabilises and stiffens the whole structure.

Wooden floor maintenance

VACUUM CLEAN THE FLOOR

Regularly (at least twice a week) clean your floors with a vacuum cleaner and a special brush attachment or with a soft sweeper. Floor mopping must be preceded by vacuum-cleaning.

USE APPROPRIATE CLEANING AGENTS

Clean wooden floors with a moist, but not wet mop. The excessive amount of water can cause swelling, warping or discoloration of the floor. Accidentally spilt liquids must be immediately wiped up, otherwise the stains will become hardly removable. Do not apply waxes, as they can easily matt the wooden surface.

PROTECT THE FLOOR AGAINST SCRATCHING

Chair or furniture legs can scratch the floor surface. Use protective caps – chair and furniture legs should be covered with protective felt pads, and in the case of swivel chairs choose ones with special castors intended for wooden surfaces. Do not use impermeable rubber mats and carpets.

TAKE PROPER CARE OF YOUR PET'S CLAWS

Regularly cut the claws of your pets, which will protect your floor from scratches. Remember to wipe clean the paws of your dog every time you come back from a walk – this way you will keep dirt and sand away from your interiors.

PROTECT THE FLOOR AGAINST DIRT

Doormats – a mixture of water and sand, coupled with intense wear of the floor brings about the same effect as rubbing the floor with sandpaper. Doormats placed at the front door and the exit to the terrace protect the floor against dirt. Keep doormats clean – replace them from time to time.

REMEMBER ABOUT AIR HUMIDITY

Keep an optimal air humidity level in the rooms, i.e. around 30-60% and temperature of 20°C; in winter, when the air humidity level drops, use air humidifiers. Remember that wood will naturally tend to achieve the state of hygroscopic balance – it is important to air the rooms from time to time.

Sustainable solutions

For years now, Baltic Wood has been pursuing its own eco-friendly policy with ambitious conservation goals, which help protect the environment and live in harmony with nature. The company's environmental awareness comes to be reflected in all the areas of its activity.

NOTE:

Baltic Wood S.A. reserves the right to change the technical parameters of the products on offer as well as to discontinue them.

Baltic Wood floors are manufactured only from natural wood, and that is why the shade, occurrence of knots, ring pattern and grain structures of particular elements – boards, slats etc. – can differ from one another as well as in relation to the photos included in all Baltic Wood marketing materials. The natural variation can be noticed when comparing the final product with the samples presented at the exposition.

The wood variety is a natural feature of this noble raw material, determining its beauty and uniqueness.
