WOODEN FLOORS

2025

Be BALTIC = Be ECO

### THREE-LAYERED WOODEN FLOORS:

- ♥ perfect for playing, relaxing and cuddling together
- ♥ create a cosy interior with a palpable touch of comfort and safety
- ♥ antiallergic
- ♥ safe for health

With passion  
for wood

Our collections were created out of a true passion for wood. We emphasize its undiscovered, natural beauty in the processes of hand distressing, brushing, bevelling, varnishing and oiling.

# Baltic Wood

Baltic Wood combines fascination for the beauty of wood and knowledge about its specialist treatment. Thanks to this, Baltic Wood floors are not only beautiful, but also perfect in terms of quality – durable, functional and easy to maintain on a regular basis.

## KNOWLEDGE AND EXPERIENCE

The company was founded 25 years ago in Poland and quickly expanded its brand into the international marketplace. Today, thanks to an extensive partner network, Baltic Wood floors reach clients in 62 countries all over the world. The modern production plant, the company head office and the sales offices are located in the town of Jasło, the Subcarpathian Province.

## SUPREME QUALITY

Creating floors of the highest quality is our main goal and priority in the strategy of the company development. All the processes – designing, planning, manufacturing and delivering the goods – are based on a single, coherent Integrated Quality and Environmental Management System.

## OUR MISSION

We believe that the floor made of the highest quality wood is that which lends a Unique character to every interior – both the Classical and the modern one. That is why we continually follow the latest trends in design so as to cater to the tastes of both traditionalists and those who value more avant-garde design.

## WE CARE FOR THE NATURAL ENVIRONMENT

We love nature and therefore we take so much care to make the manufacturing of Baltic Wood floors meet the most rigorous conservation standards. The supreme quality and care for the environment certified by: FSC, M1, TÜV.

# Wooden floors

Nature offers beauty, harmony, elegance and style which cannot be replaced with any substitute.

Baltic Wood wooden floors owe their Uniqueness primarily to nature inspiring displayed in flooring compositions that lend interiors a fascinating character.

## CARE FOR NATURE

With the support of innovative technology compliant with the highest quality standards, Baltic Wood wooden floors are sustainable and eco-friendly.

# Three-layered floors

precision of workmanship +  
reliable use

## WOODEN FLOOR

Thanks to the natural properties of the material and its characteristic and original look, wooden flooring makes it possible to create a cosy, distinguished interior with a touch of comfort and safety. Wood is warm and pleasant to the touch, and so it makes you want to walk barefoot around every nook and cranny of the house. Besides, it has very practical qualities – it muffles noises and sounds of footsteps. The natural material also ensures a long lifetime – time is on its side, making it look more and more noble, and thanks to its (multiple) renovatability, we can enjoy its unchanging beauty for many years.

## THE STRUCTURE OF THREE-LAYERED FLOOR

Baltic Wood floor comprises three layers. The top layer made of noble wood (2.7-6.6 mm thick) is covered with seven coats of lacquer or two coats of oil. Both the finishes make up, on the floor surface, a thin, flexible and durable protective coating. The middle layer (approx. 8.9 mm thick) includes transverse spruce slats that reinforce the floor flexibility. The bottom layer (approx. 1.6 mm thick) is made of uniform spruce veneer, which stabilises and stiffens the whole structure.

# Grades of oak wood

**OAK ELEGANCE**  
Special, smooth selection, subdued wood colour, none to small knots, no sapwood.

**OAK CLASSIC**  
Natural wood colour and pattern contrasts, none to medium-sized knots, no sapwood.

**OAK VILLA**  
Mix of Elegance and Classic, colour variation, medium-sized knots.

**OAK RUSTIC**  
Distinctly rustic character, vivid contrasts of wood colour and pattern, large knots, no sapwood.

**OAK UNIQUE**  
Vivid contrasts of wood colour and pattern, none to medium knots, sapwood from 1% up to 20% of the board width.

**OAK COTTAGE**  
Mix of Unique, Rustic and Superrustic. Distinctly rustic character, vivid contrasts of wood colour and pattern, large knots, acceptable external sapwood from 0% up to 20% of the board width.

**OAK SUPERRUSTIC**  
Distinctly rustic character, vivid contrasts of wood colour and pattern, large knots, acceptable external sapwood from 1% up to 20% of the board width.

**OAK NORDIC**  
Soft rustic character, vivid contrasts of wood colour and pattern, none to large knots, sapwood from 20% up to 40% of the board width.

**OAK EARTHQUAKE**  
Distinctly rustic character, vivid contrasts of wood colour and pattern, external sapwood from none up to 15% of the board width, acceptable splits.

# Sustainable solutions

For years now, Baltic Wood has been pursuing its own eco-friendly policy with ambitious conservation goals, which help protect the environment and live in harmony with nature. The company's environmental awareness comes to be reflected in all the areas of its activity.

## ARTISTIC FLOORS DISTRESSED BY HUMAN HAND

Artistically distressed three-layered oak floors in the pattern of 1-row board are manufactured in the process of saturating the wood surface with the noblest oils and pigments, carefully rubbed in by human hand after the boards have been artistically distressed in the process of planing, brushing, notching or applying the woodworm effect. Owing to the Unique technology of reactive stain and oil application, the colour of the artistically distressed floor matures over time, thanks to which it becomes even more beautiful and nobler.

The board edges are highlighted with hand-crafted bevel on each side, which crowns the unusual visual effect. The adhesive-free 2LOC joint makes for quick and clean assembly.

**Premium SIZE**

# Main features of the collection

## 100% NATURAL WOOD

Three-layered structure of 3.5 mm thick top layer made of oak, and the middle and bottom layers made of spruce.

## HAND-DISTRESSED BEVEL ON LONG & SHORT SIDE OF THE BOARD

The board edges are highlighted with hand-crafted 4V bevel on each side, which crowns the unusual visual effect.

## 2LOC ADHESIVE-FREE AND T&G ASSEMBLY SYSTEM

Adhesive-free joint, which enables a quick and clean installation. The floor is ready to be used right on installation.

\* only in the herringbone pattern

## INSTALLATION OVER UNDERFLOOR HEATING

Every floor in the collection can be installed over underfloor heating, thanks to which you will achieve the effect of a floor which is always warm to the touch.

## Hand distressed floor

## NOBLE FINISH

The Timeless Collection floors have been refined with quality, hand-rubbed oils which penetrate through the surface, thereby enhancing the everlasting and true character of wood.

## FLOORS INSPIRED BY THE SPIRIT OF NATURE

A collection of 1-strip oak floors inspired by the spirit of nature. Discover the colours of the most beautiful stones – from light grey to dark graphite, beige and deep brown.

The palette of the most fashionable colours has been achieved in the process of coating the brushed surface of the wood with coloured stains, ECO oil and varnish. Bevelling on four sides lends a Unique character to the boards. Thanks to the cutting-edge adhesive-free floor assembly systems 5G lock, installing 1 m<sup>2</sup> of flooring will take you less than 1 minute. It is possible to install the floors over a floor heating system.

With the benefit of the Unique technology of reactive stain and oil application, the floor matures over time, thanks to which it becomes even more beautiful and nobler. Colour change is a natural process, and the intensity and timing of the change depend primarily on exposure to sunlight. The biggest changes can last for as long as 6 months from the time the floor is installed.

# Wooden floor maintenance

## VACUUM CLEAN THE FLOOR

Regularly (at least twice a week) clean your floors with a vacuum cleaner and a special brush attachment or with a soft sweeper. Floor mopping must be preceded by vacuum-cleaning.

## USE APPROPRIATE CLEANING AGENTS

Clean wooden floors with a moist, but not wet mop. The excessive amount of water can cause swelling, warping or discolouration of the floor. Accidentally spilt liquids must be immediately wiped up, otherwise the stains will become hardly removable. Use only Baltic Protection System agents. Do not apply waxes, as they can easily matt the wooden surface.

## PROTECT THE FLOOR AGAINST SCRATCHING

Chair or furniture legs can scratch the floor surface. Use protective caps – chair and furniture legs should be covered with protective felt pads, and in the case of swivel chairs choose ones with special castors intended for wooden surfaces. Do not use impermeable rubber mats and carpets.

## TAKE PROPER CARE OF YOUR PET'S CLAWS

Regularly cut the claws of your pets, which will protect your floor from scratches. Remember to wipe clean the paws of your dog every time you come back from a walk – this way you will keep dirt and sand away from your interiors.

## PROTECT THE FLOOR AGAINST DIRT

Doormats – a mixture of water and sand, coupled with intense wear of the floor brings about the same effect as rubbing the floor with sandpaper. Doormats placed at the front door and the exit to the terrace protect the floor against dirt. Keep doormats clean – replace them from time to time.

## REMEMBER ABOUT AIR HUMIDITY

Keep an optimal air humidity level in the rooms, i.e. around 30-60% and temperature of 20°C; in winter, when the air humidity level drops, use air humidifiers. Remember that wood will naturally tend to achieve the state of hygroscopic balance – it is important to air the rooms from time to time.

Baltic Wood S.A. reserves the right to change the technical parameters of the products on offer as well as to discontinue them.

Baltic Wood floors are manufactured only from natural wood, and that is why the shade, occurrence of knots, ring pattern and grain structures of particular elements – boards, slats etc. – can differ from one another as well as in relation to the photos included in all Baltic Wood marketing materials. The natural variation can be noticed when comparing the final product with the samples presented at the exposition.  
The wood variety is a natural feature of this noble raw material, determining its beauty and Uniqueness.

# Three-layered wooden floor

**BALTIC WOOD FLOOR COMPRISES THREE LAYERS.** The **top layer made of noble wood** (2.7-6.6 mm thick) is covered with seven coats of lacquer or two coats of oil. Both the finishes make up, on the floor surface, a thin, flexible and durable protective coating. The **middle layer** (approx. 8.9 mm thick) includes transverse spruce slats that reinforce the floor flexibility. The **bottom layer** (approx. 1.6 mm thick) is made of uniform spruce veneer, which stabilises and stiffens the whole structure.

## Patterns & finishing

### 1R PATTERN

1-strip board

### 3R PATTERN

3-strips board

### FINISHES

ECO oil, varnishes, stains

# Warmth and harmony

Wood is a natural raw material that creates a harmonious, warm atmosphere in the room.

### FASHIONABLE SURFACE

Oak floors in the most fashionable finishes in line with current trends.

### SAFE FOR ALLERGIC PEOPLE

The advantage of wood is its antistatic and hypoallergenic properties, which are of great importance for the health of household members. Wood is a great solution for allergy sufferers because it does not contain any substances that may cause allergies and does not collect dust.

### AESTHETICS AND COMFORT

Wooden floors are a perfect aesthetic and functional solution for commercial and private interiors, giving them an individual, always unique character.

**Be BALTIC = Be ECO**
