SUPERMATT FINISH – LOOKS LIKE OIL,  
EASY TO CLEAN LIKE VARNISH

A collection of oak wooden floors in the pattern of 1-row full plank. The floor surfaces in fashionable colours have been refined and secured with elegant, supermatt varnish, which looks like oil, but it's ease to clean like varnish. Each floor is brushed and has micro-bevel on 2 or 4 sides of the board, which emphasizes its' modern character.

The floors can be installed over a floor heating system.

# FLOOR PROTECTION

1.

Regularly (at least twice a week) clean the floors with a vacuum cleaner and a special brush attachment or with a soft sweeper. Floor mopping must be preceded by vacuum-cleaning.

4.

Regularly cut the claws of your pets, which will protect your floor from scratches. Remember to wipe clean the paws of your dog every time you come back from a walk – this way you will keep away dirt and sand from your interiors.

2.

Clean the wooden floors with a moist and not wet mop. The excessive amount of water can cause swelling, warping or discoloration of the floor. Accidentally spilt liquids must be immediately wiped up, otherwise the stains will become hardly removable.

5.

Doormats – a mixture of water and sand, coupled with intense wear of the floor brings about the same effect as rubbing the floor with sandpaper. Doormats placed at the front door and the exit to the terrace protect the floor against dirt. Keep doormats clean – replace them from time to time.

3.

Chair or furniture legs can scratch the floor surface. Use protective caps – chair and furniture legs should be covered with protective felt pads and as for swivel chairs, choose ones with special castors intended for wooden surfaces. Avoid impermeable rubber mats and carpets.

6.

Keep an optimal air humidity level in the rooms, 30–60% at the temperature of 20°C. In winter, when the air humidity level drops, use air humidifiers. Remember that wood will naturally tend to achieve the state of hygroscopic balance – it is important to air the rooms from time to time.

#### NOTE:

Baltic Wood S.A. reserves the right to change the technical parameters of the products on offer as well as to discontinue them.

Baltic Wood floors are manufactured only from natural wood, and that is why the shade, occurrence of knots, ring pattern and grain structures of particular elements – boards, slats etc. – can differ from one another as well as in relation to the photos included in all Baltic Wood marketing materials. The natural variation can be noticed when comparing the final product with the samples presented at the exposition. The wood variety is a natural feature of this noble raw material, determining its beauty and uniqueness.
